Business Back-Up & Recovery

- Less than a 10% survival rate for businesses & organizations that have no backup plan
- Disaster / Business Interruption
 - Always unexpected
 - Always at the worst time
 - Comes in many forms
 - Fire
 - Theft
 - Water Damage
 - Key Employee
- Mid-range systems & PC networks are the most vulnerable
- Mid-sized organizations face the greatest risk

What is Back-Up & Recovery

- Automated, custom scheduled off-site backup of files and data
- Data is fully replicated to client's specifications
- Monitored backup process with option to archive for added security
- Encrypted and Password protected transport and storage for complete security
- No reliance on tapes to buy or switch - no need for off site removal
- Post disaster recovery smooth and seamless
- Reliable backups that happen automatically without intervention
