Providing Communications Solutions

Industrial Communications is an established and diverse wireless communications company, providing powerful communications solutions to businesses throughout New England and South Florida. Our mission is to work with individual customers to identify and design the best solution/system for their business and provide them with quality and innovative products, the best value for their money, and superior customer service and support.

Founded in 1974, Industrial Communications offers a comprehensive range of communications services and products that includes **tower construction and electrical contracting, antenna site rental and management, site acquisition and development, wireless two-way communications networks and service, wireless backhaul and wireless broadband systems.**

With our continued growth and expansion, we moved into new corporate headquarters in Marshfield, Massachusetts in 1997, expanded our regional facilities in Florida and opened a new office in Naples, Florida in May 2000.

Industrial Communications is committed to helping customers meet their communications challenges now and in the future.

Giving Quality and Value – A Total Commitment

Industrial Communications delivers efficient, quality services on tower construction projects of all sizes. This includes turnkey and build-to-suit communications facilities and special projects that require acquisition and development and unique engineering and management skills. We provide strategic tower locations and first-class facilities for communications users such as, PCS, Broadband, Cellular, Microwave, TV and Government.

We also offer wireless backhaul networks with the ability to interconnect regional systems. We are currently building a state-of-the-art high-capacity digital microwave backhaul system in southeastern Massachusetts.

Industrial's diverse portfolio of wireless communications products provides customers with innovative choices to acquire the most effective total communications solutions for their businesses.

We are an authorized Motorola two-way radio dealer, an authorized Motorola public safety radio communications dealer and Motorola Service center, serving businesses, government and public safety. We offer Motorola Canopy wireless broadband systems including WiWAN and WiLAN networks, and wireless microwave backhaul solutions. Industrial is an agent for NetworkCar GPS vehicle location and diagnostic systems, and a supplier of Bi-Directional Amplifiers (BDA) that boost signals for improved RF coverage in small and large buildings. We operate our own 900MHz trunked two-way radio network providing extended radio coverage in Massachusetts, Rhode Island, southern New Hampshire and southern Maine, as well as in South Florida.

Delivering Services and Support

Our sales and service professionals provide customers with on-going support and our Service department provides complete installation, programming and maintenance services for Motorola radios and wireless systems. We are continuing to build-out and link our existing 900MHz trunking networks to expand two-way radio coverage for customers in New England and South Florida. By operating our own 900MHz trunked radio networks, we are able to monitor individual systems 24 hours a day to ensure maximum system performance and dependability.

A Leader in Wireless Communications

Industrial Communications was recognized as a 2006 MOTOSTAR dealer and again received the Motorola Pinnacle Club Award for 2006. These awards are presented to Motorola's top national and international two-way radio dealers. Industrial Communications has received the prestigious Motorola Pinnacle Club award for several previous years and was the national winner of Motorola's 2001 Pinnacle of Customer Excellence award. We have consistently ranked as one of the top ten Motorola dealers in the United States.

Industrial is growing to meet the needs of the market and, more importantly, the needs of our customers!
